

## Activity report 2020/2021

### JOIN AGM

These two years saw a reorganization of our activities, and this was widely supported by all our volunteers who stepped up to help the population.

In particular:

- The section of Lignano Sabbiadoro, in Friuli Venezia Giulia: they organized medicines, masks and alcohol gels distributions to the homes of people in need. The population of this area was also given access to an online psychological help service, managed by a registered psychologist. Transfers between home and hospitals and inter hospital transfers continued as usual, with the addition of the transfer of minors, who were seeking asylum, in order to get the compulsory vaccinations. These activities were backed daily by at least 25 volunteers, with the help of nursing staff.
- The water rescue dog section from Gaggiano, in Lombardia: distributed, every week end of lockdown, 110 meals to people in economic need; in addition, during the Christmas period, toys and sweets were gifted to these children.
- The section of Verbania, Piemonte: distributed hundreds of liters of mineral water to the people in need who had no other support. Its volunteers have also made available their work skills, helping this population with electrical, plumbing and various other works.
- The sections from Sardegna: floods unfortunately hit these areas during lockdown, and our volunteers were readily available to support the clearing out of shops and homes.

Many other sections helped by distributing surgical masks and alcohol gel, and each sections took on the economic burden of these helps for the general population. For a few sections that did not manage to afford these, the SOGIT National Headquarters granted economic support in order to achieve and increase the coverage.
